

GREEN PROTECTION

Bowls Royce® is approved for use on indoor carpet, outdoor all-weather and outdoor lawn greens by the British Wheelchair Bowling Association (BWBA) and Disability Bowls England (DBE), Dales sports surfaces and Greengauge Sports Surfaces.

**Damien Delgado, Australia
Commonwealth Silver 2022**

“I believe this innovation makes a positive impact for disability bowls as it gives the disabled bowler the ability to be self-sufficient rather than to rely on others to project them on the green.”

GARY FAGG MBE; CHAIRMAN NEW ROMNEY BC

Accessible Equipment makes for successful clubs

in 2019 New Romney Bowls Club in Kent bought their first manual bowls wheelchair from Bush Hill Bowls and opened up their all-weather green to all ages and those with disabilities. Wheelchair bowlers quickly became proficient and regular team members.

In 2022 BOWLS ROYCE® wheelchair users Damien Delgado of Australia and Craig Bowler of England won Commonwealth Games medals.

Empowering Independence

FREE PRACTICE

Never need to find another member to push you up and down the green. You can be independently active and resume practice solo sessions without needing to find a colleague with free time in their diary

OFFICIALLY APPROVED

The BOWLS ROYCE® is approved by all national and international bowling bodies for use in all competitions.

Bowls Carpet manufacturers Dales and Greengauge approve BOWLS ROYCE for use on their indoor bowls green surfaces.

Denise Rolland, Cheshunt IBC

MANUAL or ELECTRIC

The manual BOWLS ROYCE is self-propelled using traditional wheelchair power - your own arms or a colleague.

The battery-powered option gives the bowler complete independence of movement between ends and on the mat.

AFFORDABLE

Never before has a bowling wheelchair - whether manual or electric - been available at such affordable prices. This is a major breakthrough in accessibility for the sport of bowls!

Widen the appeal of your club By adding one or more BOWLS ROYCE® wheelchairs to your club equipment you can become a focus for local community activities, including school and scouting association participation.

KEEP ON BOWLING

What stops you from bowling? Do you have asthma or COPD, acute tendonitis, back or knee problems?

Or maybe you can bowl perfectly well from the mat, but just can't cope with all the walking up and down the green.

If you are a wheelchair user already did you know that there is a wheelchair approved for use on both indoor and outdoor greens?

REGAIN YOUR INDEPENDENCE

This wheelchair may be the bowling aid that re-enables the game you thought you had to give up for ever. Or perhaps it will open new possibilities of sport, social conviviality and even competition that you never thought possible.

PLAY AWAY TOO!

Both the manual and the electric BOWLS ROYCE® wheelchairs have quick-release hubs. The wheels quickly remove to make for easy storage in most car boots to make travelling to away games with your wheelchair easier. The powered chairs will play an average of 80 ends before needing a battery recharge. Recharging is easy too, from a standard mains socket.

WORLD-CLASS PARALYMPIC ENGINEERING

Shown (right) - the quick-release hub designs for the BOWLS ROYCE® powered wheelchair are the invention of Paralympic seated throwing frames product engineer Harry Kirby.
